DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
Group I, claim(s) 38-55, 72, and 75 drawn to coding cost based on a simple motion estimation and a coding cost based on the complex motion estimation of Figure 1.

Group II, claim(s) 56-62, 73, and 76 drawn to coding cost based on inter-prediction and coding cost based on intra-prediction of Figure 16.

Group III, claim(s) 63-71, 74, and 77 drawn to coding cost based on field structure and frame structure of Figure 19.

The inventions listed as Group I-III do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT 13.2, they lack the same or corresponding technical features for the following reasons: the special feature of the Group I invention is to coding cost based on a simple motion estimation and a coding cost based on the complex motion estimation while the special feature of the Group II invention is coding cost based on inter-prediction and coding cost based on intra-prediction while the special feature of the Group III invention is coding cost based on field structure and frame structure. Since the special technical feature of Group I invention is not present

Art Unit: 2621

in the Group II-III claims and Group II invention is not present in Group I and III and Group III invention is not present in the Group I-II claims, unity of invention is lacking.
